 MITEL | it's about **YOU**

# The Evolution of the Business Telephone

---

The Mitel® 5200 IP Desktop portfolio puts the power of Voice-over-IP (VoIP) where it matters most: on the user desktop. Designed with ergonomics and modern office aesthetics in mind, 5200 IP Desktop devices and peripherals give users easy, intuitive access to feature-rich IP Telephony plus advanced IP-based applications. From affordable entry-level IP phones to sophisticated network devices, wireless phones, consoles and conference units – only Mitel 5200 IP Desktop answers the diverse communications needs of everyone across the enterprise.

## **Delivering the Power of IP to the User Desktop**

The true promise of VoIP is at the user desktop, where combining voice, data and video enables advanced new IP-based multimedia applications. The 5200 IP Desktop provides rapid and intuitive access to its industry-leading 500+ IP Telephony features and the growing range of IP-based multimedia network applications supported by the Mitel family of Integrated Communications Platforms (ICPs). Enhancing individual productivity and supporting operational requirements across the enterprise, these applications include speech-enabled solutions, unified communications, collaboration, contact center solutions, and more.

## Getting Personal with Business Communications

The 5200 IP Desktop portfolio gives users unprecedented levels of personal control over their business communications. The phones and devices feature a context-sensitive softkey / display combination – technology that was pioneered by Mitel almost a decade ago. This combination reduces user uncertainty while supporting efficient call processing, application access and preferences programming by displaying only those prompts appropriate to the function in progress. Users can likewise easily program their personal phone preferences via their web browser. In fact, one 5200 IP Desktop device – the Mitel 5230 IP Phone – even combines the power of IP Telephony and Personal Digital Assistant (PDA) technology to provide users with unparalleled levels of access, flexibility and control.

### Mitel 5230 IP Phone

The 5230 IP Phone delivers unparalleled device integration, enabling users to leverage two of today's most powerful business tools – the telephone and the PDA.

# The Industry's most complete IP Desktop Portfolio

The award-winning 5200 IP Desktop is built on the company's three decades as desktop innovators. It is the only IP desktop portfolio on the market that responds to the specialized and differing demands of users, workgroups, departments and branches across the enterprise.

Mitel 5240 IP Phone

With its built-in web browser and intuitive access to converged applications, the 5240 IP Phone brings the power of IP to the user.

From simple to sophisticated IP phones...

Mitel 5207 IP Phone

Mitel 5215 IP Phone

### 5200 IP Phones

The Mitel range of IP phones answer communications requirements from the shop floor to the corner office to the contact center.

Mitel IP devices integrate voice communications with PDA and web technology to provide users with real-time access to powerful IP applications.

Mitel 5550 IP Console

### Wireless Devices

Mitel IP platforms support mobile users within the enterprise with a solution that provides wireless in-building access to the same call handling features available at the wired desktop.

### Mitel 5310 IP Conference Unit

The 5310 IP Conference Unit features superior voice quality and plugs into the Mitel 5220 IP Phone to instantly transform any room into a collaborative environment.

Mitel 5220 IP Phone with Mitel 5412 and 5448 Programmable Key Modules (PKM)

### PC-Based IP Console

Mitel offers an integrated PC-based IP console and telephony keypad which provides intuitive, screen-based access to rich call-handling features.

### Programmable Key Modules

Mitel 5412 and 5448 Programmable Key Modules (PKM) add 12, 48 or 96 additional programmable buttons to the 5220 IP Phone for attendant and specialized position support.

# The Art of Design

---

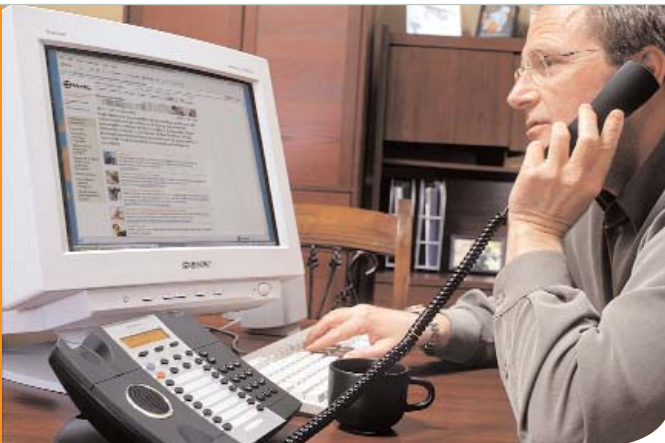

## The Science of Ergonomics

The 5200 IP Desktop portfolio is the next stage in the evolution of the business telephone, delivering the power of IP communications in sophisticated devices whose sleek forms are matched only by their easy, intuitive operation.

### A Single Wire to the User Desktop

Most 5200 IP Desktop devices are dual port, with two 10/100 Mb switched Ethernet ports. This means the user's PC or any other IP device can be connected to a 5200 IP series phone, which is in turn connected to a single Ethernet wall jack. Standards-based powering options provide maximum flexibility – all 5200 IP phones are supported by an AC adapter and all can accept power directly over the LAN via standards-based (IEEE 802.3af) spare-pair or signal-pair powering.

Dedicated headset jack eliminates need for separate amplifier box

Distinctive chrome speaker ring

Highly legible, warm orange LCD display

Softkey and single button access to features and applications

Customizable center panel

Tactile button response on dial pad and feature keys

Removable card for key labeling

## Put the Power of IP on the Desktop Today

Superior voice quality, easy access to applications and features, unparalleled interface design and ergonomics – Mitel 5200 IP Desktop sets the standard for desktop user access to powerful new IP-based applications and services. Take a close look and you will quickly agree that there isn't another desktop IP portfolio that can match Mitel features, functionality and application access – while responding to the communications requirements of individual users across the entire enterprise.
