

June 1, 2007

To whom it may concern:

This letter is to introduce Verge Network Solutions, Inc. to your bank as an outstanding provider of telecommunications services and phone systems. After a significant search and considerable due diligence on our part, TBB selected Verge and the Iwatsu Voice Networks Enterprise Communications System (ECS) to serve our bank, and we highly recommend you consider them as well.

I am writing this letter because we have found the team at Verge to be extremely knowledgeable and helpful with our needs during implementation. They were very helpful in the transition and arranged every detail so as to have minimal impact on the bank.

The system is already providing us with significant enhancements in our productivity, and we are enjoying reduced monthly expenditures thanks to the efforts of Verge and the savings they have negotiated with our service providers. I am sure that your bank will benefit by meeting with Verge and learning first hand how they might help your bank.

If you would like to visit with me personally, or discuss our experience, please don't hesitate to give me a call. I wish you luck in you search, and know you can't go wrong by choosing Verge.

Sincerely,

Don Abernathy
President
